Alpha Survey USV

One-person-handle | Fully integrated | Detachable Propeller

Quick Preparation

Configure or pack up in 1 minute.

Long Working Time

Maximum working time 5h. 2 batteries enough for 1 day job.

Detachable Propeller

Dual pump jet detachable propeller, easy to maintain. Maximum speed at 6 m/s, well perform on torrent.

4G For Remote Control

4G network brings unlimited control distance.

Intelligent Obstacle Avoidance

40-meter heading radar sensing, decelerating within 10 meters to avoid potential dangers in real time.

Single Beam Bathymetry

Built-in high-sensitivity depth echo sounder, sounding 0.2 meters the shallowest.

Protection

Streamline slope design at the back of the boat with blade-like filter and pump protect the vehicle from being entangled by aquatic plants.

Detachable Propeller

When the propeller is entangled with fishing line and other debris, it does not need to be returned to the factory for repair. The operator can use the supporting tools to quickly disassemble it on site, eliminate the problem, and then continue working.

All-in-One USV Control Software

The alpha software system is a software solution used for route planning, parameter setting, hull control, data display, status display and data export, etc. Customized maps and satellite image maps can be imported or downloaded when the network is working. The software system is able to automatically generate routes, execute navigation tasks, continue navigation task after breakout and finally return to the place of departure.
